PROFESSIONAL SUMMARY

QA Engineer with 2+ years of hands-on experience in manual functional, regression, and exploratory testing across enterprise web applications, ERP platforms, and AI-driven systems. Builds scenario-based test plans and compatibility coverage suited to fast-moving agile teams, rather than leaning on heavy documentation. Skilled in requirements, system, and integration testing; defect triage and tracking in Jira; and validating business logic, usability, and UI behavior across browsers and devices. Experienced in API testing with Postman, SQL-based data validation, and foundational security testing (XSS). Communicates confidently with product managers, designers, and developers to keep testing aligned with release planning. Currently completing ISTQB Foundation Level (CTFL), expected 2026.

CORE COMPETENCIES

- | | | |
|--|--|------------------------------------|
| – Manual, Regression & Exploratory Testing | – Requirements & Integration Testing | – API Testing (Postman) — GET/POST |
| – Test Planning & Scenario Design | – Defect Triage & Tracking (Jira) | – Security Testing Basics (XSS) |
| – Compatibility & Cross-Browser Testing | – Business Logic, Usability & UI Testing | – SQL & Database Validation |
| – Agile/Scrum SDLC Planning | – Cross-Functional Communication | |

PROFESSIONAL EXPERIENCE

Functional Test Analyst / QA Engineer — OneFlare Technology Solutions Jan 2025 – Present

- Test Planning:** Scope and plan testing each sprint for a high-volume eCommerce ERP platform, building structured checklists and traceable test cases covering forms, search, navigation, listings, and checkout.
- Exploratory, Scripted & Compatibility Testing:** Pair scripted regression with exploratory testing across business logic, usability, and UI behavior, plus cross-browser/cross-device coverage to catch compatibility issues early.
- Defect Triage:** Log, triage, and track defects in Jira with reproducible steps, screenshots, and severity classification, prioritizing fixes against release timelines with developers.
- System, UAT & End-to-End Testing:** Coordinate UAT with business stakeholders and run system/end-to-end testing across web and mobile, confirming production readiness before each release.
- API & Data Validation:** Validate API responses in Postman (GET/POST) and write SQL queries to confirm database records against expected application behavior.
- Stakeholder Communication:** Produce clear testing progress reports and collaborate with developers, business analysts, and project leads on shared documentation and process improvements.

QA Engineer — Functional & Integration Testing — Genesis Digital Labs Jan 2024 – Jan 2025

- Exploratory Testing Across Integrations:** Designed and executed manual functional and exploratory test scenarios across AI-driven systems and full-stack web applications, probing integration boundaries and edge cases across microservices.
- Requirements Review & Data Pipeline Validation:** Evaluated testability in requirement reviews and built Python/SQL validation for data pipelines end-to-end — transformation accuracy, consistency, and integrity under load.
- Defect Documentation:** Authored structured test coverage reports, defect logs, and risk analyses to support release governance and retrospective analysis.
- Cross-Functional Collaboration:** Partnered with developers and business analysts to clarify ambiguous requirements, reproduce reported defects, and drive timely issue resolution.

KEY PROJECTS

OneFlare eCommerce ERP — End-to-End Regression Suite: Manual and automated coverage across registration, browsing, cart, and checkout — each case mapped to a real business workflow.

Hotel Management System — Playwright Automation Framework: TypeScript automation for an active beta product, eliminating 24+ hours/week of manual regression effort.

National Logistics KPI Platform — Power BI · SAP ERP · DAX · SQL: Consolidated real-time data from 20+ depot locations into a drill-through BI platform for regional analytics.

EDUCATION

M.Sc. Industrial Microbiology (Hons)	2015
University of Ilorin, Nigeria	
B.Sc. Microbiology (Hons)	2010
University of Ilorin, Nigeria	

CERTIFICATIONS

ISTQB Foundation Level (CTFL)	In Progress, 2026
Software Testing Certification	Power Learning Africa
Agile Methodology Certification	HP
Lean Six Sigma — Green Belt	Heineken Int'l, 2016
